## SUMMARY

### Introduction

Bangladesh is divided into seven administrative divisions: Dhaka, Chittagong, Rajshahi, Khulna, Barisal, Sylhet and Rangpur. Each division is divided into several districts and each district into several upazilas. Each urban area in an upazila is divided into wards. Upazilas are divided into union parishads (UPs) and pourasovas. These divisions allow the country as a whole to be separated into rural and urban areas. Management Information System (MIS) has been operational under the Directorate General of Family Planning (DGFP) for a long time. Contraceptive Performance, MCH, Reproductive Health and Nutrition service's report are used to be published each month from MIS Unit on the basis of Service Statistics received from the field workers, service delivery clinics and NGOs. Erstwhile Family Welfare Register, however, is the principal source of performance statistics. This report is prepared on the basis of FWA Registers (8th Edition) and Clinic Report. Most of the FWAs visit their working area once in every two months. It is a continuous process. FWA register modified/updated in every three years.

There is a reporting system to collect the information from the field. MIS Reporting Form-1 is filled up by the FWAs and submitted the same to FPIs. FPI fills up the MIS reporting Form-2 by compiling of all the FWAs (MIS Form-1) report and submits to UFPO office. MIS reporting Form-3 (clinical) is filled up by MO(clinic)/(MCH-FP)/(FW)/SACMO/ FWV and is submitted to UFPO office. NGOs of the respective area submit their report to UFPO office through MIS reporting Form-2 and 3 as their requirement. All the reporting Form-2 and 3 are compiled by UFPO office and filled up reporting Form-4 (union wise) and is entered in online web based software (SS). District FP Office review and Submit that report. It provides information of contraceptive use status of eligible couples and different types of MCH, Reproductive Health and Nutrition services. MIS performance report is primarily used by different level of program managers and supervisors engaged in implementing the Family Planning, MCH, RH and Nutrition program in the country. Besides, different policy makers, decision makers, donor agencies, Development Partners, researchers and other users also use this report.

### Family Planning Performance (CAR related):

Performance reports of May'18 have been received from all the 64 districts of the country. During the month of May'18 total numbers of eligible couple were found to be 27264958 as against 27239523 in the previous month. Performances of NGOs are also included in the report as reported by the Upazila Offices. A total of 21567329 acceptors are reported in the month of May'18 as against 21550807 in April'18. The Contraceptive Acceptance Rate (CAR) achieved at the end of the reporting month for six modern methods (Permanent Method, IUD, Implant, Injectables, Oral Pill and Condom) is 79.1 which was 79.1 as April'18. Method Specific Acceptors (Cumulative), Method Specific New Acceptors and Contraceptive distribution by Methods are shown in the summary sheet. It may be noted that the contraceptive acceptance rate is an estimate, based on the client contact and the status of contraceptive acceptance as reported by the field workers based on the entries made in the FWA register. The Contraceptive Prevalence Rate (CPR), on the other hand, is based on periodic surveys that are made on precise statistical procedures.

The acceptance rate is a tentative rate and varies from month to month because of reporting status and coverage. This rate is usually higher than the Contraceptive Prevalence Rate (CPR). CAR is generally used to monitor as a management tool 'on-going' program performance in the country. It is not so much used to evaluate the program impact or goals, which is done by periodical scientific surveys.

## **Nutrition Programs of the Directorate General of Family Planning**

Since 2011, the MCH Services Unit of the DGFP has been implementing MYCNSIA (Maternal and Young Child Nutrition Security Initiatives in Asia) in collaboration with UNICEF in 22 upazilas of 10 districts. The initiatives taken include: counseling to mothers/caregivers about IYCF, distribution of Micro Nutrient Powder (MNP) among 6-23 months old children, counseling of pregnant and lactating mothers on feeding practice and Iron Folic Acid (IFA), food security intervention, and hand-washing/hygiene practice in the communities. For implementing the MYCNSIA, MCH Services Unit of DGFP trained officials at various levels (both TOT and core training), developed training materials, developed web-based MIS, conducted baseline survey, and procured and distributed MNP sachets, etc. MCH Services Unit of DGFP will scale up nutrition intervention in other upazilas and districts gradually. Service registers and reporting formats were revised to include nutrition information. The DGFP's MIS is currently revisited for nutrition indicators and collected information at MIS formats from January 2016.

**Clarification about the information of summary sheet, table-2 and table-3:**

**Method Specific Acceptors:**

In the summary sheet, Method Specific Acceptors is shown based on the field workers (FWA) visit of the reporting month and also the previous month. These are the cumulative figure which includes previous month's acceptors and reporting month's new acceptors collected by the field workers within their working areas.

**Contraceptive distribution by Method:**

In the summary sheet, Contraceptive Performance by Method is prepared based on the performance and distribution of the reporting month. These figures are actual performance of the reporting month which is not comparable with the information written in method specific acceptors.

**Table- 9, Table-10 and Table-11**

Performance shows in the table-9 and 10 is the actual performance of the respective month but the new acceptors show in the table-11 is may not be the performance done in the same month. It may happen that the new acceptors accepted method in the previous month but field workers shown that case in the next month due to their rounding schedule. So the performance of table-9, table-10 will not be the comparable with the new acceptor of table-11.

**Clarification about the information of MCH and Reproductive Health Services:**

- Information shown against 'delivery' which done in MCHTI, MFSTC, MCWCs, UHCs & UH&FWCs. This report is collected through the MIS reporting Form-3. So it is not the whole country's delivery records. This report is absolutely excluding the city corporations.
- Information shown against the 'live births' conducted at Govt. MCH, DH, MCWC, UHC, UH&FWC, NGOs & Home. The information is collected by FWAs through field visit. Field workers visit their units monthly and they submit their reports in every month.
